# E-175H

High Output Nitrogen Generator

## THE MOST POWERFUL NITROGEN GENERATOR IN ITS CLASS

The NitroFill E-175H is our ultra-high output E-175 minus the automatic inflation unit, providing a super high output (26 cfm) nitrogen generation system for applications that do not require an automated inflator.

The NEW NitroFill E-175H is the highest output...an amazing 26 cfm! ... nitrogen generator in its class, providing blazing fast production and conversions for the most demanding applications. The E-175H provides enough output to inflate a 12.00R X 22.5 tire from zero to 120 psi in only 2.5 minutes!

The E-175 combines NitroFill's legendary performance and durability with the highest output available, making it the perfect choice for truck tire facilities, fleet operators and high volume commercial service centers. No other system provides so much for so little.

### Features:

- Complete System, nothing else to buy.
- Quad, exterior mounted high performance inlet air filters.
- Advanced PSA design.
- Instant and uninterrupted flow with guaranteed purity up to 99.9%.
- Ultra-High Output. "Best in Class" 26 cfm output make the E-175 a fit for almost any size truck or fleet service facility.
- 5 year warranty\*
- Each unit comes fully assembled, just plug and play!

### General Specifications

Power Requirement	100/240Vac 50/60Hz
Operating Temperature	-4°F to 158°F
Compressed Air Input Range	125-200psi
Compressed Air Quality	0.01ppm
Nitrogen Purity	95-99+% [Adjustable]
Nitrogen Output	26 CFM rated at 160psi, 80°F.
Maximum Nitrogen Pressure in Tank	174psi
Shipping Weight	783 Pounds
Net Weight	705 Pounds
Dimensions [Container]	57"H x 28.5"W x 43"D
Dimensions [Unit]	52"H x 28"W x 39"D
